

Regeneration in the Park of Consumption

Adventure in the Park of Extreme Environment

Relaxation in the Park of the Elements

TONO's Brain and Stomach

Presupposition:

- A) The scientific research in TONO should be international.
- B) You need two points of different intensity to create a flow of energy.
- C) The counter pole of psychic production (scientific research) is physical consumption.

Deduction:

$$\frac{\text{scientific research}}{\text{consumption}} = \frac{\text{internationality}}{?}$$

$$? = \frac{\text{consumption} \times \text{internationality}}{\text{Scientific research}}$$

and with: consumption x internationality = tourism

$$? = \frac{\text{Tourism}}{\text{scientific research}}$$

TONO Science Research City

2002, 2nd price in international competition

architects: Schmidt & Kunzemann Architects

objekt: design of a science city in Gifu / Japan

gross area: 200 ha
